B.Sc. in Computer Science and Engineering
Patuakhali Science and Technology University (PSTU)
2023 – Present

PROFESSIONAL SUMMARY

Full Stack Engineer and SWE student specializing in scalable web applications, REST API design, and end-to-end system development. Proficient in Spring Boot backend paired with modern frontend technologies. Possesses a solid understanding of software design principles, database optimization, and seamless UI/UX integration to deliver highly maintainable and performant products.

PROJECTS

Bazar Dor Monitoring — Market Price Tracker

Live Link • GitHub

React · Node.js · Express · MongoDB · JWT

- Price dashboard with live price ticker, price rise/fall sections, and category pages with sorting (price, biggest rise, biggest fall).
- Product details page with lowest, highest, and average price summary and a market-wise price table.
- Authentication with Better Auth (email/password, Google, GitHub) and a profile page to update account info.
- Toast notifications, skeleton loaders, custom 404 page; fully responsive with all text and numbers in Bangla.

FitLog App — Workout Planner

Live Link • GitHub

Next.js · Tailwind CSS · MongoDB

- Workout library with detail pages; add workouts to Today's Plan, save for later, mark as done, or remove.
- Live totals for calories, duration, and number of exercises.
- Responsive dark UI for mobile and desktop.

CareHealth App — Health Management App

Live Link • GitHub

Flutter (Dart) · Firebase Auth · Cloud Firestore · Firebase Cloud Messaging · Firebase Hosting · Provider

- Cross-platform health management app built with Flutter and Firebase, available on Android and Web.

CERTIFICATIONS & TRAINING

- Complete Web Development Course — Programming Hero (Batch 14, 2026)
